Portfolio Website

SUMMARY

Software Engineering graduate with hands-on experience in Full Stack Web Development, REST APIs, database integration, cloud computing, and AI-enabled applications. Completed an 8-week Website Developer internship at Barkat Meat House during Summer 2026. Skilled in React.js, Node.js, Express.js, MongoDB, JavaScript, Python, Git, GitHub, Docker, Linux, and AWS. Developed multiple academic and full-stack projects including an AI-based diabetic retinopathy detection system, an e-commerce web application, and an AI-driven fraud detection system. Seeking an entry-level Software Engineer, Full Stack Developer, or Web Developer role.

Urdu ●●●●●

PROFESSIONAL EXPERIENCE

Barkat Meat House
Website Developer Intern
- Completed an 8-week Website Developer internship in a professional business environment.
- Assisted with website development and maintenance tasks.
- Applied web development knowledge to real-world business requirements.
- Supported improvements related to the company's web presence.
- Worked with assigned development tasks and deadlines.

EDUCATION

Bachelor of Engineering in Software Engineering
Iqra University – EDC Campus, Karachi
10/2022 – 2026 | Karachi,Pakistan
CGPA: 3.52 / 4.00

Intermediate (Pre-Engineering)
Gulshan-e-Iqbal Block-7 Commerce & Science College
03/2020 – 03/2022 | Karachi,Pakistan
A Grade (74%)

TECHNICAL SKILLS

Programming Languages
- JavaScript, Python, Java

Frontend
- HTML5, CSS3, Tailwind CSS

Backend
- Node.js, Express.js, RESTful APIs
- MongoDB, MySQL, PostgreSQL

AI / Machine Learning
- YOLOv8, CNN, Image Processing, Grad-CAM

Cloud & Tools
- AWS, Docker, Linux, Git, GitHub

PROJECTS

Eyenova – AI-Based Diabetic Retinopathy Detection & Clinical Decision Support System
Final Year Project | Python, React, YOLOv8, MongoDB, AWS
- Developed an AI-powered web application for diabetic retinopathy screening and clinical decision support.
- Built a responsive clinical dashboard and integrated backend/database functionality.
- Implemented retinal image preprocessing, disease severity classification, and **Grad-CAM explainability**.
- Worked on **AWS Cloud deployment** and backend integration.
- Currently implementing YOLO-based retinal lesion detection and automated reporting.

Full-Stack E-Commerce Web Application
React, Node.js, Express.js, MongoDB, Github
- Developed a responsive e-commerce application using React and modern web technologies.
- Built backend services and RESTful APIs using Node.js and Express.js.
- Integrated PostgreSQL for application data management.
- Worked on AWS-based cloud deployment and Git/GitHub version control.

Agentic-AI-fraud-Detection-System
A real-time, AI-driven blockchain monitoring dashboard that detects fraud, analyzes wallet risk, and scores transactions across Ethereum, BSC, and Solana using agentic intelligence

ACHIEVEMENTS

- Completed Bachelor of Engineering in Software Engineering.
- Developed multiple full-stack applications.
- Built an AI-powered healthcare solution as a Final Year Project.
- Gained hands-on experience with AWS cloud deployment and Linux server management.
- Completed an 8-week Website Developer internship.
